TRACER 1000™

The TRACER 1000™ is a trace (ppb/ng) analyzer used to detect explosives, narcotics and CWAs serving the worldwide security needs for airports, ports of entry, border crossings, secure buildings, public events and the military.

TRACER 1000™
Valuable Features

▶ The first ECAC certified mass spectrometer Trace Detector

▶ Significantly improves passenger flow and safety

▶ The only Trace Detector with a near zero False Alarm Rate

▶ Ready for new threats with instant updates available

▶ Any new library additions do not increase false alarms

▶ Laboratory instrument but very easy to operate

▶ Detects both explosives & narcotics in seconds

▶ The lowest total cost of ownership

4.1 billion people move through the worldwide airport system every year.
